Purpose & Method

Purpose

Every year we study what Le Moyne's graduates are doing following commencement.

Whether graduates are working, attending graduate school, seeking employment, volunteering, or serving in the military, our goal is to obtain the most thorough and accurate picture of the post-graduation activities of the members of every class.

Method

In accordance with the guidance of the National Association of Colleges and Employers (NACE), we define the Class of 2023 as those who earned undergraduate degrees from Le Moyne College between July 1, 2022 – June 30, 2023.

Some of what we know about the post-graduation outcomes of the members of the Class of 2023 comes from their responses to our online survey. We invited them to take the survey beginning in August 2023 and continued collecting responses through December 2023.

In addition to our survey, we collected data on the Class of 2023 from employers, faculty/staff, LinkedIn, the National Student Clearinghouse, and from other Le Moyne surveys.

By combining data from all of these sources, we were able to account for the post-graduation outcomes of 68% of 2023 graduates.

Primary Post-Graduation Outcomes

Class of 2023

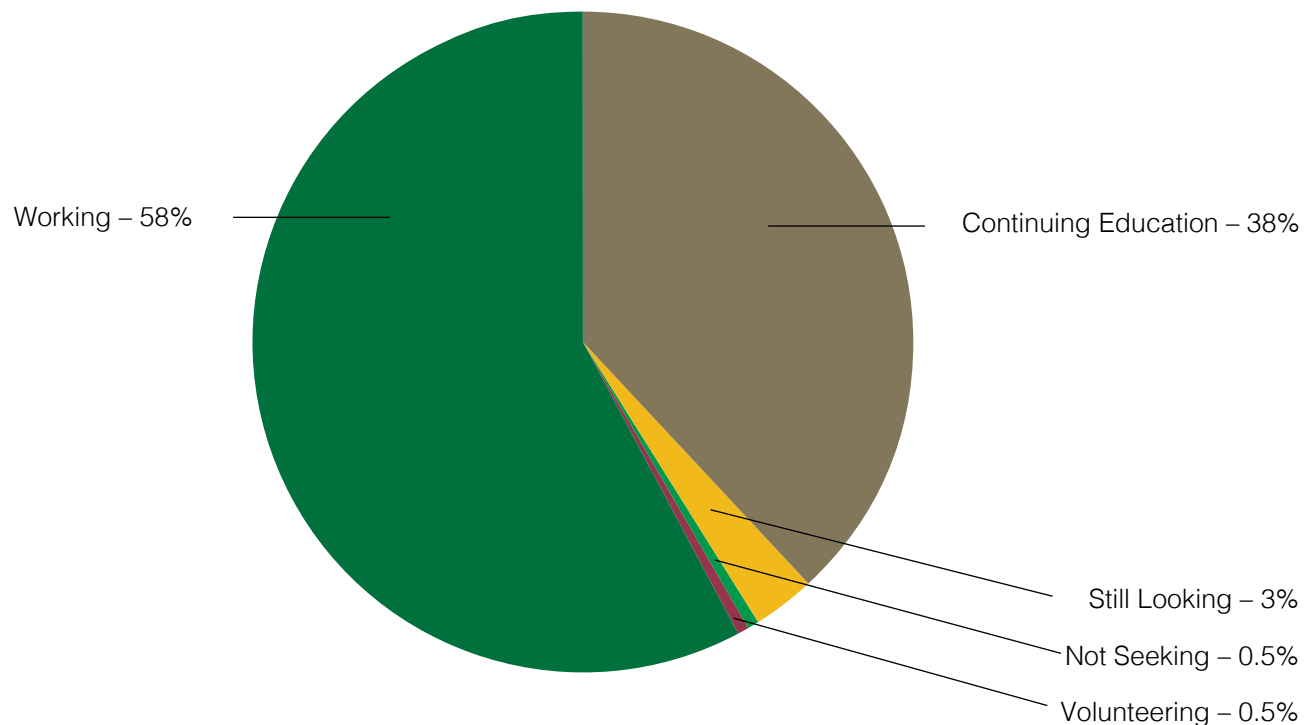

Outcomes Rate

97%

The outcomes rate is the percentage of the class who is either working, attending graduate school, serving in the military, or volunteering full time. For the Class of 2023, our outcomes rate is 97 percent.

Primary Post-Graduation Activities

Primary Post-Graduation Activities	Number	%
Working	237	58%
Continuing Education	155	38%
Still Looking	11	3%
Volunteering	2	0.5%
Not Seeking	2	0.5%
Military	1	0%
Total Class of 2023	408	100%

Primary Post-Graduation Outcomes

Class of 2023

Knowledge Rate

68%

The knowledge rate is the percentage of the class for whom we were able to find reliable information on their post-graduation activities. For the Class of 2023, our knowledge rate is 68 percent.

Knowledge Rate by School

Employment Information | Class of 2023

Starting Salaries

To calculate starting salaries, we only use the salary data reported by those working full-time positions. We do not include the compensation data reported by graduates whose primary post-graduation activities are volunteer services, and we do not use any compensation information of those who report being paid a monthly stipend. Salary is not a required survey item, so we do not get the salary data for 100 percent of those working.
